## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Speronello U.S. patent No. 5,974,810.

Speronello teach the treatment of articles including harvested agricultural products with chlorine dioxide in amounts ranging from 0.025 ppm to 1000ppm. The article is contacted with chlorine dioxide at a first concentration which is then reduced and then is contacted with a lower concentration. The first concentration can exceed the IDHL or Immediately Dangerous to Life and Health of approximately 5 ppm, and the lower concentration can be as low as 0.025 ppm. See Fig. 1, column 6, lines 5-35, column 8, lines 7-23 and lines 39-40 and the examples.
